

## Politik meets Pharma

### Minister of Economic Affairs Jürgen Barke at MiP Pharma in Homburg

As part of his summer tour, the Minister of Economic Affairs of Saarland, Jürgen Barke, visited MiP Pharma at the Homburg site. On site, he discussed current developments at the location, investments in modern production lines, and the strategic direction of MiP Pharma.

It was an engaging exchange about regional responsibility, modern pharmaceutical supply, and the role of the pharmaceutical SME sector.

At the end of his visit, Minister Barke summarized: “Companies like MiP Pharma demonstrate how important the SME sector is as the backbone of our economy, especially here in Saarland, where we rely on a mix of industry, services, and high-tech. This diversity secures jobs, promotes innovation, and makes our location future-proof in times of change.”

We thank him for the visit and appreciate the interest and support from regional politics. In this way, MiP Pharma, together with policymakers, makes a strong contribution to the pharmaceutical location Saarland.
